Profile

I am a Software Engineer with a passion for solving problems and a commitment to continuous learning. I have over 3 years of programming experience, particularly in web development and backend technologies using Node.js and PHP. I stay up-to-date with the latest market trends in technology and am eager to apply my skills to real-world challenges. I pride myself on my ability to collaborate effectively within teams and communicate complex concepts clearly. My organized and detail-oriented approach helps me navigate intricate coding tasks and project requirements efficiently. I am enthusiastic about contributing to innovative projects and further developing my skills in a dynamic environment.

Education

BSc in Software Engineering   01/2022 – Present
Addis Ababa Science And Technolory University(AASTU)
Software Engineering Student

Professional Experience

Inter at Kuraz Technologies   07/2025 – 09/2025
https://www.kuraztech.com/ 🔗   Addis Ababa, Ethiopia
Learned Laravel and done real-world team projects

Google Developers Group (GDG) Hackathon   01/2025 – 04/2025
GDG AASTU   Addis Ababa, Ethiopia
Collaborated with a team to design and implement a microfinance application aimed at lending to farmers based on their productivity metrics.

Projects

AgriPay Later Backend   02/2025 – 06/2025
GDG Hackathon Team Project - Node.js, Express, MongoDB
Developed a full-featured backend system for a micro-loan and harvest management platform that connects farmers with administrators. Implemented secure authentication (JWT), role-based access control, and RESTful APIs for user registration, loan requests, repayments, and harvest tracking.

My-Fitness Pal   06/2025 – 09/2025
Intern Team Project - Laravel, MySQL
Developed a comprehensive RESTful API using Laravel to power a cross-platform health and fitness tracking application. The system enables users to manage food intake, exercise logs, weight check-ins, and personalized fitness goals — with full analytics and admin management capabilities.

Wired Hotel Website   01/2025 – 05/2025
Team Project - HTML, CSS, JS, PHP
A web-based application designed to streamline hotel management operations and provide a seamless booking experience for both clients and administrators. It features a dual-interface design, catering to end-users (guests) and administrators (hotel staff).

Skills

- HTML + CSS + JS
- C++
- MySQL DB
- Python
- PHP/Laravel
- Node.js and Express.js
- Java
